

ALTERNATIVE INKS. DIGITAL PRINTING

Marabu

SWITCH IT! – THE REAL ALTERNATIVE TO OEM DIGITAL INKS

With its „Switch-it!“ concept, Marabu offers a real alternative to OEM printing ink. Simply replace the original ink of your printer by one of Marabu’s digital printing inks and benefit from many advantages:

- Development and production of Marabu digital printing inks under the same strict tolerances as OEM printing inks (Made in Germany)
- Straightforward compatibility (available in all common refill systems such as cartridges, bags, bottles)
- High quality and improved performance with simultaneous reduction of production costs
- Professional support and assistance from our team of application engineers

Marabu alternative inks fulfill the globally approved standards for the labeling of low emission products and are therefore Greenguard Gold certified. Our digital printing inks comply with the strict requirements for chemical emissions of volatile organic compounds (VOC) into interior air. They are tested for a wide range of chemicals and can also be used in particularly sensitive environments such as hospitals and schools.

For additional information visit our website www.marabu-inks.com or contact us at digitalsales@marabu.com
